

Unlock Potential • Drive Impact

At ThinkLab, we believe that **unlocking a person's full potential** and those around them begins with self-awareness and extends to impactful action within teams and organizations. Our **experiential learning programs** are designed to enable participants to understand their own thinking processes, reflect on their practices, and equip them with practical tools for personal and professional growth that ripple outward to positively influence their surroundings.

WHY THINKLAB?

ThinkLab challenges leaders and individuals to rethink their approach to leadership and its impact on teams and business outcomes. We understand that effective leadership goes beyond traditional skills; it requires the ability to advocate ideas, lead with empathy, solve problems, foster alignment, and demonstrate resilience.

WORKSHOPS OFFERED

Critical Thinking

This workshop equips participants with essential critical thinking skills to ask incisive and empathetic questions, enhance creativity, objectively analyze, evaluate and interpret information accurately, necessary for effective problem-solving and decision-making.

Leading Teams to Think Critical

This workshop is designed specifically for leaders to focus on creating a culture of critical thinking within their teams and organizations. Leaders will learn to cultivate empathy, foster team growth, and employ tools that encourage collaboration and alignment, ultimately driving better outcomes.

Growth Mindset

This workshop cultivates a mindset geared towards continuous learning, resilience, and personal development. Participants explore techniques for setting and achieving goals, maintaining motivation, and persevering in the face of challenges, fostering a culture of growth and development.

Big Picture Thinking

This workshop expands your perspective and allows you to gain insights into complex systems and interconnected elements. Participants learn to consider long term implications, analyze underlying patterns, and articulate holistic solutions that inspire consensus and drive meaningful action.

TAILOR-MADE SOLUTIONS

We understand that every organization has unique leadership and business development goals. That's why we offer tailor-made workshops designed to address specific organizational needs and challenges. Whether it's adapting existing workshops or creating entirely new programs, we work closely with our clients to ensure maximum impact.

THE FACILITATOR

Dr. Marietjie van der Merwe

With over twenty years of experience in workshop facilitation and a PhD focused on critical thinking and systems thinking methodologies,

Dr. Marietjie van der Merwe is a trusted expert in her field. She has worked with leaders from various sectors, helping them harness the power of critical thinking, dialogue, and reflection for personal and business growth.

TESTIMONIALS FROM PARTICIPANTS IN THE BANKING SECTOR

"It was a great experience, and this training has enabled me to look at different aspects of a problem - eliminating assumptions and shift to a learner mindset."

"It has really been a good experience to be able to learn and apply critical thinking concepts. By putting them into practice, it will definitely improve working styles, workload management and communication approach."

"During the workshop I applied the different tools in a real situation from my day-to-day work and the results were good. The tools helped me to find the right solution."

"I should have done this workshop earlier in my career!"
